Tools & Deployment	: Git, GitHub, VS Code, Vercel
Payments	: Stripe
Soft Skills	: Communication, Problem Solving, Time Management

Projects

1. LifeDrop - Blood Donation Management System

[Client](#) | [Server](#) | [Live](#)

- A blood donation web application designed to connect donors with recipients efficiently.
- Allows users to search donors by blood group and location for quick matching.
- Includes secure authentication, role-based dashboards, and integrated Stripe payment for funding support.
- Designed RESTful API endpoints with pagination and filtering

Technologies Used: React.js, Shadcn UI, Tailwind CSS, Firebase, Node.js, Express.js, MongoDB, REST API, JWT, Stripe

2. Royal Ville - Hotel Booking Management System

[Client](#) | [Server](#) | [Live](#)

- A hotel booking web application for browsing rooms and managing reservations.
- Enables users to book, update, and cancel reservations with real-time validation to prevent double bookings.
- Includes ratings and reviews system with secure authentication and responsive design.
- Implemented secure authentication using Firebase Admin SDK with JWT-based authorization

Technologies Used: React.js, Daisy UI, Firebase, Tailwind CSS, Node.js, Express.js, MongoDB, REST API, JWT

3. Recipe Book - Recipe Management Platform

[Client](#) | [Server](#) | [Live](#)

- A responsive recipe management web application with secure authentication.
- Allows users to add, view, and manage recipes with detailed instructions and images.
- Features like/dislike system with automatic wishlist management and light/dark theme toggle.

Technologies Used: React.js, Daisy UI, Firebase, Tailwind CSS, Node.js, Express.js, MongoDB, REST API, JWT
